Secondary Glazing

Considering Secondary Glazing?

Advice & Information

How can I reduce my fuel bills?

With the cost of UK gas and electricity soaring, reducing your heating bills may seem a bit of an uphill challenge.

More and more people are asking how to save money on heating, how to insulate the home, the reason for draughts in the home, how to save on heating costs, how to reduce heat loss in the home, office or factory, where to get cheaper fuel and reduce energy usage or how to cut fuel and heating bills.

A few simple steps can significantly reduce heating costs and generate significant savings whilst making your home or workplace more comfortable.

If you notice a draught, heat is escaping, forcing you to increase the heating to compensate. This wastes expensive gas, oil or electricity and the most common cause of draughts are poorly sealed windows. Whilst fitting draught excluders will reduce the effect to a degree, over 10% of the heat will still escape through the glass.

Replacement double glazing is an obvious option, but for many this is impractical due to cost or they are living or working in a rented or leasehold property and landlords are often reluctant to pay for the building to be double glazed. Permission to change the windows may be refused where the building is Listed, has a Preservation Order or is in a Conservation Area.

Secondary glazing is an economical alternative to double glazing where a new "secondary" window is installed on the inside of an existing window, which remains in place, and makes a significant contribution to saving energy and heating bills.

We guarantee to eliminate draughts through windows. There are no maintenance problems and best of all **CHEAPER HEATING BILLS**. Secondary glazing helps to create a thermal barrier and significantly reduces street noise.

Secondary glazing is unobtrusive, can be opening or fixed, and can be installed quickly and without the need for building works or redecoration.

Secondary glazing can be the ideal solution for Listed Buildings (subject to listing detail) or those in Conservation Areas where replacing existing windows is not a practical option. No planning consent required.

If you have draughty single glazed windows and want to significantly reduce your heating bills, if you suffer from noise from roads or aircraft, or if you want to improve your home security, secondary glazing offers a cheap and effective solution.

Discount Secondary Glazing design, supply and fit quality, low cost secondary double glazing that will improve your home and quality of life.

What are the advantages of Secondary Glazing?

Secondary Glazing...

- Eliminates draughts and improved insulation reduces heating bills
- Improves sound insulation significantly reducing road and aircraft noise
- Won't detract from your home's exterior - retain the character of your existing windows
- Is unobtrusive - slender frames do not detract from the look of your rooms
- Offers a choice of fixed, hinged, lift-out plus vertical and horizontal sliding units
- Can be opened, slid aside or removed completely
- Is significantly cheaper than replacement double glazed windows
- Is quick to install and does not require redecoration after fitting
- No planning consent required
- Is easy to maintain and clean
- Increases home security

Can Secondary Glazing be fitted to any window type?

Secondary Glazing is suitable for...

- Sash windows - vertical sliding secondary glazing
- Bay windows - vertical sliding, horizontal sliding, side hung or fixed secondary glazing
- Side hung windows - horizontal sliding or side hung secondary glazing
- Top hung windows - vertical sliding or top hung secondary glazing
- Shaped windows - secondary glazing can be manufactured to suit shaped windows too!

And remember, secondary glazing...

- Offers a choice of fixed, hinged, lift-out plus vertical and horizontal sliding units
- Flexible design means that secondary glazing can be opened, slid aside or removed completely
- Is significantly cheaper than replacement double glazed windows
- Is quick to install and does not require redecoration after fitting
- Is easy to maintain and clean
- Increases security
